

# 3/4 Measurement Project

## Task: To plan and organise the MPPS School Fete

Your job over the next week is to organise a school fete for MPPS. You have lots of things to organise!

Before we start to organise the fete, we need to collect some information from the school community about what they might like to see and do at the fete.

You need to collect some data about these 3 categories

1. Food and drink stalls or trucks  
(Pizza, tacos, fish and chips, donuts, ice cream)
2. Entertainment  
(Ferris wheel, giant slide, disco tent, bumper cars)
3. Entertainers  
(Clown, magician, band, face painter)

### Steps

- Develop a question  
*eg. What food stalls would you like at the school fete?*
- Brainstorm up to 6 categories  
*eg. Fish and chips, pizza, donuts, tacos etc.*
- Ask your classmates to select an option in the survey and tally your result
- Use your data to develop a column graph.
- You will need to complete this 3 times (Food and drink stalls, entertainment and entertainers).

Good Luck!
